

The figure consists of four maps of the Wrocław voivodeship, each showing the distribution of enterprises in the manufacturing sector for a specific year. The maps are arranged horizontally from left to right, corresponding to the years 2015, 2016, 2017, and 2018. The voivodeship is divided into counties, and the number of enterprises in each county is represented by a color-coded area. The colors range from light yellow (low density) to dark red (high density). The maps show a general increase in the number of enterprises over time, with a significant concentration in the central and eastern parts of the voivodeship in 2016 and 2017.
